What are the hallmarks of any great SUV? They're spacious, versatile, and safe. Whether you're flying solo or cruising with family and friends, it's important to make sure you have the right SUV to suit everyone's needs.

That's where the family of 2021 Honda SUVs can help. There's something for everyone in this family, and you'll learn more about each member in this *2021 Honda SUV Buyer's Guide*.

We'll cover:

- Honda HR-V
- Honda CR-V
- Honda Passport
- Honda Pilot

After reading this eBook, you'll have all the knowledge needed to choose the SUV that matches your lifestyle. Let's meet the family!

## 2021 Honda SUVs Overview

There are four vehicles in the lineup of 2021 Honda SUVs. They range in size and capability, so you're sure to find one that's just the right fit for your family, friends, and adventures.

Honda SUV	Segment	Maximum Cargo Capacity
Honda HR-V	Subcompact SUV	58.8 cubic feet
Honda CR-V	Compact SUV	75.8 cubic feet
Honda Passport	Compact SUV	100.7 cubic feet
Honda Pilot	Midsize SUV	109 cubic feet

Whether you're looking for enhanced all-terrain capability, extra seats for a few friends, or a fleet-footed subcompact efficient enough to take on the daily commute, there's a Honda SUV for you.

## 2021 Honda HR-V

The Honda HR-V is the smallest sibling in this family of SUVs, and it packs a punch all its own. It's ideal for drivers looking to get a leg up on their commute into the city. It's efficient and compact and comes with tons of connected features to help you stay in touch with the world around you.

### ***Efficient Performance***

It comes standard with an in-line 4-cylinder engine that pumps out 141 horsepower and 127 lb-ft of torque. It works alongside a Continuously Variable Transmission (CVT) that helps all trim levels with 2WD achieve an EPA-estimated 28 city/34 highway MPG.<sup>1</sup> You can also engage Sport Mode to breathe even more life into the ride.

The HR-V comes standard with the Eco Assist™ System that will help optimize your fuel economy. It acts as an efficiency coach. When the display on your dashboard glows green, you're driving efficiently. When it's white, you may be braking or accelerating too hard. That tends to cause more fuel consumption.

When rain and slick roads get in your way, the available Real Time AWD with Intelligent Control System™ will come in handy. It distributes power to all the wheels so you can enjoy sure-footed control.

### ***Is the Interior Magic?***

If you need to stow extra cargo in the HR-V, the second-row Magic Seat® may make you feel like a magician. It can be configured into one of three storage options that will help you take full advantage of the 58.8 cubic feet of cargo space.

The available comfort amenities may feel quite magical as well. Whether you're winding down from a day full of adventure or gearing up for one, you'll get to relax with the following:

- Leather-trimmed seats
- Heated front seats
- 8-way power adjusting driver's seat
- Leather-wrapped steering wheel
- One-touch power moonroof

You'll be able to stay connected inside the Honda HR-V thanks to available features like Apple CarPlay® and Android Auto™ integration. They'll put your favorite apps and music right onto the available 7-inch touch-screen display.

## 2021 Honda CR-V

The Honda CR-V is the multifaceted middle sibling in the family of Honda SUVs. It can handle everything from the daily commute to a family road trip. It brings both power and confidence-inspiring safety to the table.

### ***Versatile Performance***

The adaptability of the CR-V all stems from its performance. It can do just about anything. Are you heading to work? The combination of a 190-horsepower turbocharged in-line 4-cylinder engine and a CVT help all trim levels with 2WD achieve an EPA-estimated 28 city/34 highway MPG.<sup>2</sup> It also allows the Honda CR-V to tow up to 1,500 pounds.

Real Time AWD is also available with the Honda CR-V. It will help you hit slick roads and dirt trails with confidence. Meanwhile, the Intelligent Control System™ makes sure your CR-V is running efficiently with 2-wheel power when extra traction isn't needed.

Do you need a hybrid SUV? The CR-V is the only Honda SUV that offers an available hybrid configuration. An in-line 4-cylinder engine teams up with an AC synchronous permanent-magnet electric motor to achieve up to 212 total system horsepower. Plus, all hybrid trim levels achieve up to an EPA-estimated 40 city/35 highway MPG.<sup>2</sup>

## ***Innovative Honda Technology***

You'll have the whole world in the palm of your hands inside the Honda CR-V. It comes with a litany of connective features and you can control them all right from the available 7-inch touch-screen display. They include:

- Bluetooth® HandsFreeLink® and streaming audio
- Apple CarPlay®
- Android Auto™
- SiriusXM®
- Honda Satellite-Linked Navigation System™

The available Apple CarPlay® and Android Auto™ integration will provide access to your favorite apps and playlists on the go. You can also sync your phone to the standard Bluetooth® HandsFreeLink® to make phone calls and send texts without taking your focus off the road.

When you need to find your way, shout out your destination and voice recognition will input it into the available Honda Satellite-Linked Navigation System™. Whether you're heading to work or a vacation destination, you'll also be able to find your way around congestion thanks to available Honda HD Digital Traffic.

## 2021 Honda Passport

All families have a wild child, right? In the family of Honda SUVs, it's the Passport. It's ready to hit the trails and go way off the map at any time. Its rugged design and capable performance elements can take you anywhere your heart desires.

### ***Your Passport to Adventure***

A 3.5L V6 powers the adventurous spirit of the Honda Passport. It has plenty of muscle with 280 horsepower and 262 lb-ft of torque. It comes with Idle-Stop, which shuts down the engine automatically while idling. That will help save fuel and cut down on emissions while you admire the view from atop that conquered mountain peak.

The available Intelligent Variable Torque Management™ AWD System is built to take on tough trails. Dirt, mud, sand, or snow—nothing can get in the way of this Honda SUV. It intuitively reverts power to the specific wheels that need it most. It works with the Intelligent Traction Management System, which includes four selectable drive modes:

- Normal
- Snow
- Mud
- Sand

This SUV promotes comfort on even the roughest trail. Its 4-wheel, fully independent suspension lets each wheel adjust to changing terrain without impacting the response of the others. It helps absorb bumps and smooth out your ride.

### ***Bring It All With You***

When you're traveling way off the map, you need plenty of cargo space to store all your gear. Whether you have a few tents and some provisions or your bike and some fishing equipment, the Honda Passport can carry it all. It offers the following storage features:

- 60/40 split rear seatback
- Underfloor storage
- Multi-functional center console
- Hands-free power tailgate
- Roof rails

When your hands are full of camping gear, flick your foot under the rear bumper and the available hands-free power tailgate will open automatically. That will give you easy access to the 100.7 cubic feet of cargo space. If you're transporting bigger cargo—your favorite kayak, perhaps—you can fasten it to the roof with the available roof rails.

Do you have a home away from home? You can pull your favorite travel trailer to the campsite with the Passport. It boasts a maximum towing capacity of 5,000 pounds when outfitted with the AWD system. That also gives you the power to pack up a utility trailer if you'd rather have more room for your hiking gear.

## 2021 Honda Pilot

It's a safe bet the Honda Pilot is the elder sibling in the family of Honda SUVs. How do we know that? It's always looking out for everyone. It has the largest seating capacity, so no one will get left behind and it's packed with smart safety features to help keep everyone protected.

### *Interior Space and Comfort*

<b>Seating Capacity</b>	8 passengers
<b>Passenger Volume</b>	152.9 cubic feet
<b>Headroom</b> (first/second/third row)	40.1/40.2/38.9 inches
<b>Legroom</b> (first/second/third row)	40.9/38.4/31.9 inches
<b>Cargo Volume</b> (behind third/first row)	18.5/109 cubic feet

Inside the Honda Pilot, there's seating for up to eight passengers and plenty of wiggle room for your whole clan with over 152 cubic feet of passenger volume. You can all relax in the available leather-trimmed seats and find your ideal comfort level with the available tri-zone automatic climate control system.

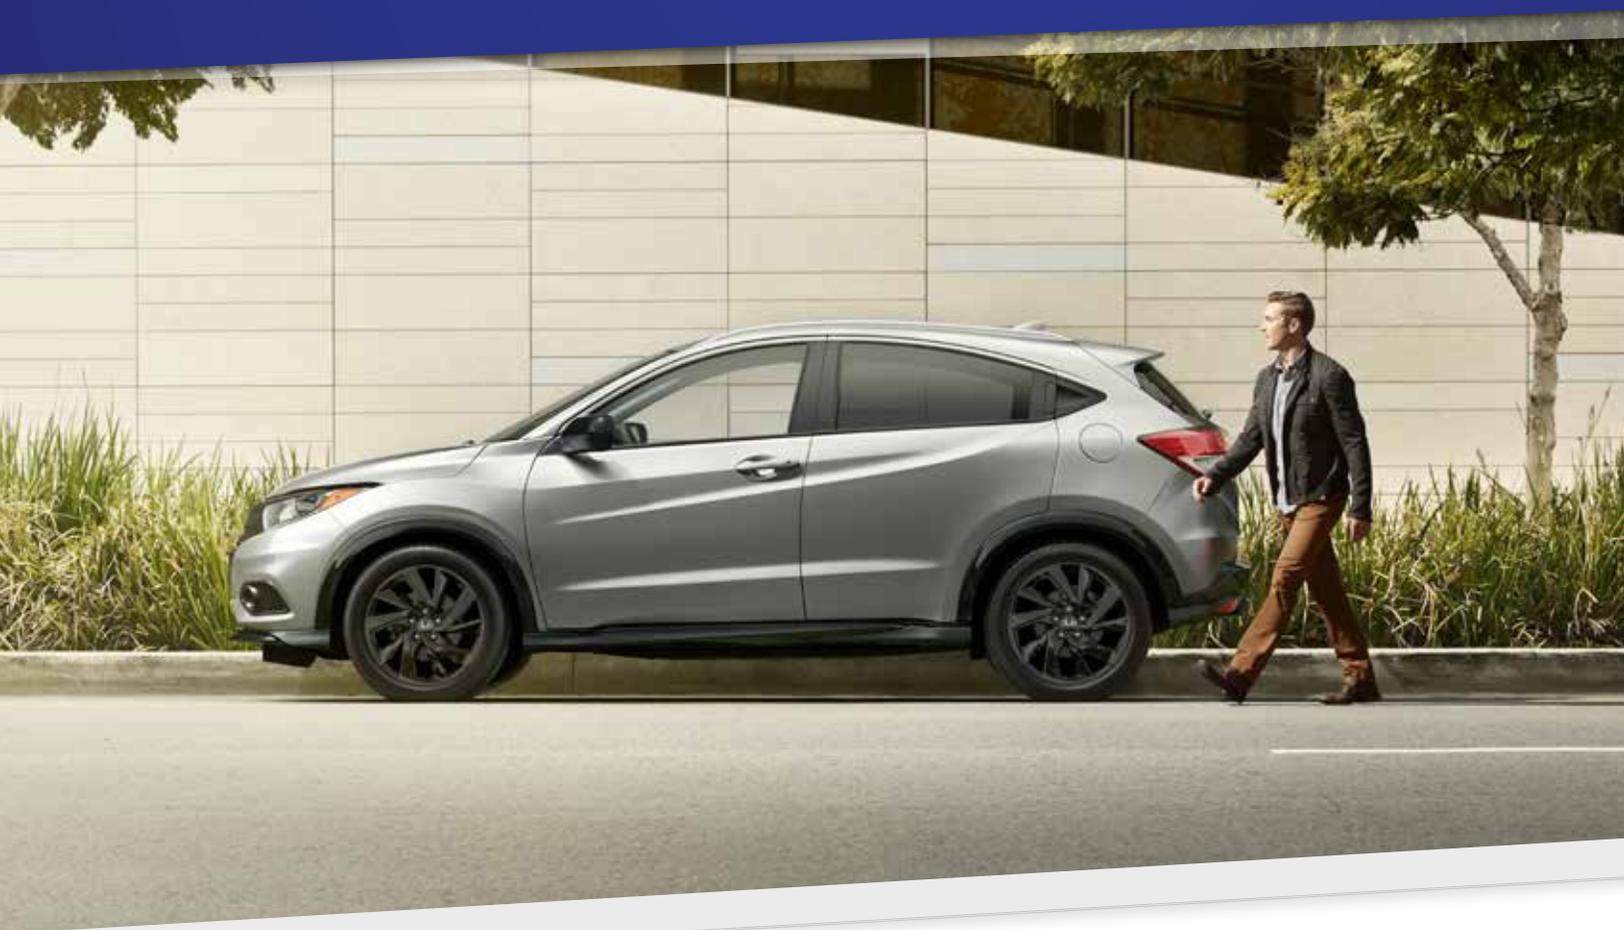

When your friends are all the way in the back seat, you'll be able to easily carry on a conversation without shouting. The available CabinTalk® in-car PA system works through the audio system or individual headphones and makes communicating between rows a breeze.

### ***Honda Sensing® Technologies and Safety***

The Pilot—like all Honda SUVs—can be equipped with Honda Sensing® technologies. This suite of safety and driver-assistive features comes standard on this SUV and gives you the peace of mind that comes with:

- Collision Mitigation Braking System™
- Road Departure Mitigation System
- Adaptive Cruise Control
- Lane Keeping Assist System
- Forward Collision Warning
- Lane Departure Warning

You can also take advantage of the available Blind Spot Information System. It will warn you when a vehicle is lurking in your blind spot, so you can change lanes and merge onto the open road safely. It works with a Cross Traffic Monitor that will help ensure the coast is clear before you back out of a tight spot.

## Find Your Favorite Honda SUV Today!

What are you looking for in your next SUV? Is it off-road capability or all the space and comfort you can handle? Maybe you just want a compact option with efficiency and energy. In any case, there's a Honda SUV that will suit your needs.

You can meet the entire family in person at your local Honda dealer. Bring your loved ones and let everyone find their favorite. We'll help you secure a valuable financial offer to go along with it so you can hit the road with a smile.
